AWS Solutions Architect	AWS SysOps Administrator	Azure Administrator (AZ-104)	Azure Network Engineer (AZ-700)	MCSA Windows Server 2016
AWS Associate	AWS Associate	Microsoft Certified	Microsoft Certified	Microsoft Certified

EXECUTIVE SUMMARY

Manager Project and Cloud Solution Specialist with 10+ years of progressive infrastructure engineering leadership across AWS, Microsoft Azure, Life Sciences Laboratory Information Management Systems (LabWare LIMS & ELN), and hybrid enterprise data centers. Proven track record designing resilient, high-availability multi-AZ architectures; executing large-scale, zero-downtime server & database migrations (1,000+ servers); and driving systematic FinOps cost governance resulting in over **$60,000/month** in documented recurring savings. Expert in DevSecOps automation, GxP/CSV regulatory compliance, and managing high-stakes cloud environments for global enterprises including **Cognizant**, **Johnson & Johnson**, **LoanTap**, **ISRO**, and **Indian Air Force**.

CORE TECHNOLOGY STACK & ARCHITECTURAL DOMAINS

Life Sciences & LIMS	LabWare LIMS, LabWare ELN, Labvantage LIMS, GxP Compliance, Computer System Validation (CSV), Life Sciences Cloud Modernization, Audit Vaults, Data Integrity Standards
Amazon Web Services (AWS)	EC2, S3, EBS, EFS, RDS, Aurora, Lambda, VPC, ELB/ALB/NLB, Auto Scaling, Route 53, CloudFront, AWS Backup, DMS, MGN, Migration Hub, IAM, WAF, Shield, GuardDuty, CloudWatch, Systems Manager, EKS
Microsoft Azure	Azure Virtual Machines, Virtual Networks (VNets), NSGs, Azure SQL Database, Blob Storage, Managed Disks, Availability Sets, Microsoft Entra ID, Azure Monitor, Azure Migrate, Cost Management
FinOps & Cost Governance	AWS Cost Explorer, Azure Cost Analysis, Reserved Instances (RI), Savings Plans (SP), Compute Optimizer, S3 Lifecycle Rules, Idle Resource Cleanup (**$60,000+/mo documented savings**)
DevOps, IaC & DevSecOps	Terraform, CloudFormation, Jenkins, GitHub Actions, Docker, Kubernetes (EKS), Bash scripting, CI/CD automated deployment pipelines, security compliance scanning
Systems & Platforms	Linux (RHEL, CentOS, Ubuntu), Windows Server 2012R2/2016, AD DS, Group Policy (GPO), Hyper-V, Apache, Nginx, Oracle WebLogic, PHP, Redis Cache, VMware ESXi, Horizon VDI
Network & Cloud Security	Multi-AZ VPC/VNet, Public/Private Subnets, NAT Gateways, Transit Gateway, IPSec Site-to-Site VPN, Cloudflare CDN/WAF, IAM RBAC, MFA Enforcement, Compliance Baselines

PROFESSIONAL EXPERIENCE

Manager Project | ISG LSMG Labware Practice

Oct 2026 – Present

Cognizant | Life Sciences Practice | Gurugram, India (Hybrid)

Directing enterprise LabWare LIMS & ELN cloud deployments, secure migrations, and cloud modernization for global Life Sciences clients.

- Lead enterprise **LabWare LIMS & ELN** cloud deployments, secure workload migrations, and infrastructure modernization across AWS and Azure for global Life Sciences organizations.
- Drive **DevSecOps practices** and automated Infrastructure-as-Code (IaC) provisioning while maintaining stringent cloud security postures, data integrity, and **GxP / CSV** regulatory compliance.
- Architect high-availability multi-region cloud landing zones ensuring audit readiness, automated disaster recovery, and sub-minute RTO/RPO for mission-critical laboratory workflows.
- Orchestrate cross-functional delivery teams across cloud architecture, security compliance, validation engineering, and client enterprise stakeholders.

Cloud Solution Specialist | Enterprise Delivery

Dec 2022 – Sep 2026

Hanu Software (now part of Insight Enterprises) | Client: Johnson & Johnson | Delhi, India

Architected enterprise multi-cloud solution infrastructure across AWS & Azure, ensuring healthcare compliance, zero-downtime cutover, and automated operations.

- **Sole Architect & Implementation Lead** for Johnson & Johnson's mission-critical Labvantage LIMS platform across AWS, delivering 100% SLA compliance.
- Executed zero-downtime server and database migrations from on-premises to AWS using **AWS MGN and AWS DMS** with continuous CDC replication and zero data loss.
- Engineered resilient multi-AZ infrastructure utilizing EC2, Multi-AZ RDS, S3, and Network Load Balancers (NLB) fronting 10+ application VMs.
- Configured **Oracle WebLogic** for enterprise EAR deployments; authored reusable Bash automation scripts and AWS SSM runbooks for routine patching.
- Hardened cloud perimeter via IAM least-privilege, AWS WAF, AWS Shield, and proactive CloudWatch telemetry.

PROFESSIONAL EXPERIENCE (CONTINUED)

Cloud Specialist | Infrastructure & FinOps — Jan 2022 – Dec 2022

LoanTap Financial Technology Pvt Ltd | Pune, India

Owned AWS cloud infrastructure, database reliability, security hardening, and FinOps governance for a high-volume consumer fintech platform.

- Architected and provisioned end-to-end AWS environments across development, staging, and production tiers from scratch.
- Administered LAMP/LEMP stacks, WordPress, PHP, MySQL, Redis cache, Nginx, Route 53, Cloudflare DNS/CDN, and Application Load Balancers.
- **Reduced monthly cloud expenditure by $2,000/month** through targeted instance rightsizing, storage tiering, and idle cleanup.
- Built automated CI/CD deployment pipelines using GitHub and Jenkins, accelerating release cycle frequency by 65%.
- 🏆 **Awarded Employee of the Quarter (April 2022)** for exceptional cloud architecture, zero-downtime deployments, and direct financial impact.

Team Lead – Cloud Operations | Managed Services — Mar 2020 – Jan 2022

Rapyder Cloud Solutions India Pvt Ltd | Bengaluru, India

Supervised a Managed Services engineering team overseeing 150+ client AWS accounts, driving cloud migrations, FinOps, and 24/7 ITIL operations.

- **Spearheaded FinOps cost governance yielding $28,000/month recurring savings for Dhani** via compute rightsizing of 100+ EC2 instances, Reserved Instances (RI), Savings Plans (SP), and S3 lifecycle tiering.
- Led on-premises to AWS server migrations for **50+ enterprise workloads** using CloudEndure with zero data loss and strict SLA compliance.
- Designed multi-AZ VPC networks with public/private subnets, NAT Gateways, bastion hosts, and Site-to-Site VPN tunnels.
- Mentored 15+ cloud engineers, handled tier-3 escalation incidents, and authored standard operating procedures (SOPs).

System Engineer | Data Center & Virtualization — May 2017 – Mar 2020

Cerebra Integrated Technologies Ltd | Bengaluru, India

Delivered on-premises data center buildouts, virtualization, and enterprise networking for defense, space, and state government sectors.

- **Architected 100-client air-gapped VMware Horizon VDI for ISRO (SDSC SHAR)** using VMware ESXi, vCenter, and Dell Wyse thin clients in an isolated high-security enclave.
- **Constructed mini data center for Indian Air Force (Bengaluru)** featuring Fujitsu Primergy servers, hardware RAID-5, Hyper-V failover clustering, and Active Directory Domain Services.
- **Engineered 45U data center for Karnataka State Remote Sensing (KSRSAC)** with 9 disk enclosures connected to Fujitsu Eternus DX-500 SAN storage via 10G SFP fiber channels.

SELECTED HIGH-IMPACT ENTERPRISE PROJECTS

CLIENT & DOMAIN	ARCHITECTURAL SOLUTION & MEASURABLE BUSINESS IMPACT
Cognizant Life Sciences Practice	Directing LabWare LIMS & ELN multi-cloud deployments on AWS/Azure; implementing DevSecOps automation, GxP/CSV validation, and high-availability regulated life sciences architectures.
Johnson & Johnson Healthcare Enterprise	Multi-AZ AWS infrastructure for Labvantage LIMS with Oracle WebLogic, NLB, Multi-AZ RDS, and AWS WAF/Shield; achieved 100% zero downtime and healthcare data compliance.
Dhani Financial FinTech Scale	Comprehensive FinOps optimization across 100+ EC2 instances, implementing rightsizing, Reserved Instances, and S3 lifecycle rules to deliver **$28,000/month recurring savings**.
ISRO (SDSC SHAR) Aerospace & Defense	Engineered 100-seat isolated VMware Horizon VDI environment connected to Dell Wyse thin client hardware, ensuring zero internet exposure and strict aerospace data protection.
Indian Air Force Defense Infrastructure	Built on-premises mini data center with Fujitsu Primergy servers, hardware RAID-5, Hyper-V virtualization, and Active Directory Domain Services in 45U defense racks.
Biryani By Kilo E-Commerce / FoodTech	Multi-account AWS infrastructure utilizing AWS Organizations, Aurora MySQL, Auto Scaling Groups, and Route 53; supported 50,000+ peak concurrent orders with zero service degradation.

EDUCATION

Bachelor of Science in Information Technology (B.Sc. IT)
Kalinga University
2014 – 2017 | First Class

3-Year Polytechnic Diploma in Computer Engineering
Govt. Polytechnic, Adityapur | SBTE Jharkhand
2009 – 2012 | First Class with Distinction

HONORS & RECOGNITION

🏆 **Employee of the Quarter (April 2022)**
LoanTap Financial Technology Pvt Ltd
Recognized for architecting cost-effective AWS infrastructure, cutting monthly cloud spend by $2,000/mo, and achieving 100% uptime during high-volume loan disbursement campaigns.
