AWS Solutions Architect
Associate

AWS SysOps Admin
Associate

Azure Administrator
Associate

Azure Network Engineer
Associate

MCSA Windows
Server 2016

TECHNICAL PROFILE

Cloud Architect and Solution Specialist with 9+ years of infrastructure experience. Designs secure, highly available, cost-optimized platforms; executes large-scale server and database migrations; automates infrastructure delivery; and leads operations across cloud, Linux, Windows, networking, security, monitoring, and FinOps. Delivered solutions for Johnson & Johnson, LoanTap, ISRO, Indian Air Force, NIMHANS, Navi, ServicePlus, and Biryani By Kilo.

CORE TECHNOLOGY STACK

AWS	EC2, S3, EBS, EFS, RDS, Aurora, Lambda, VPC, ELB/ALB, ASG, Route 53, CloudFront, Global Accelerator, Backup, DMS, MGN, Migration Hub, IAM, WAF, Shield, GuardDuty, CloudWatch, EKS
Azure	Virtual Machines, VNets, NSGs, SQL Database, Blob Storage, Azure Files, Managed Disks, Snapshots, Availability Sets, Entra ID, Azure Monitor, Azure Migrate, Cost Management
DevOps & IaC	Terraform, AWS CloudFormation, Jenkins, GitHub, CI/CD pipelines, Bash scripting, infrastructure automation, container orchestration, Kubernetes/EKS
Systems & Web	Linux, Windows Server 2012R2/2016, ADDS, GPO, DNS, DHCP, IIS, Hyper-V, Apache, Nginx, Tomcat, WebLogic, WordPress, PHP, Redis
Network & Security	VPC/VNet architecture, public/private subnets, IGW, NAT Gateway, VPN, OpenVPN, Route 53, Cloudflare, IAM, MFA, WAF rules, GuardDuty, security groups, compliance controls
Data, Virtualization & Ops	MySQL, SQL Server, RDS, AWS DMS, VMware ESXi, vCenter, Horizon VDI, RAID-5, failover clustering, Site24x7, StatusCake, ServiceNow, Zoho

PROFESSIONAL EXPERIENCE

Cloud Solution Specialist

Dec 2022 - Present

Hanu Software (now part of Insight) | Client: Johnson & Johnson

Own cloud solution design and delivery for enterprise workloads across AWS and Azure, with emphasis on secure architecture, migration, operational reliability, and automation.

- Designed scalable AWS infrastructure using EC2, S3, RDS, Lambda, ELB/ALB, VPC, IAM, WAF, and Shield for regulated enterprise applications.
- Migrated servers and databases from on-premises environments using AWS MGN, AWS DMS, Azure Migrate, discovery, dependency assessment, validation, and cutover planning.
- Built reusable CloudFormation and Terraform patterns, standardized provisioning, and supported CI/CD-driven deployments.
- Administered Linux, Apache, Nginx, MySQL, Oracle WebLogic, patching, monitoring, incident response, and production troubleshooting.
- Led architecture discussions and knowledge-sharing sessions with client teams, improving cloud adoption and operational handoff.

Cloud Specialist

Jan 2022 - Dec 2022

LoanTap Financial Technology Pvt Ltd

Owned AWS infrastructure, application hosting, database operations, security controls, migrations, and FinOps for a fast-growing financial technology platform.

- Built AWS infrastructure from scratch and deployed applications across development, staging, and production environments.
- Managed WordPress, PHP, MySQL, Redis, Nginx, Apache, phpMyAdmin, Route 53, Cloudflare DNS/CDN, WAF, and ALB rules.
- Executed web and database migrations from on-premises environments to AWS with backup, validation, and rollback planning.
- Implemented CI/CD pipeline setup and operational management using GitHub/Jenkins workflows.
- Reduced cloud spend by approximately \$2,000 per month through rightsizing, scheduling, storage optimization, and billing analysis.

Team Lead - Cloud Operations

Mar 2020 - Jan 2022

Rapyder Cloud Solutions India Pvt Ltd

Led managed cloud operations and ITIL-aligned service delivery across AWS, Windows, Linux, networking, monitoring, security, and migration engagements.

- Managed incident, request, and change workflows while mentoring engineers and coordinating stakeholder escalations.
- Designed VPCs, subnets, routing, NAT, VPN, security groups, IAM roles, backup, monitoring, and disaster recovery patterns.
- Improved backup/recovery, access governance, monitoring, alerts, and cloud cost controls across managed customer environments.

PROFESSIONAL EXPERIENCE - CONTINUED

System Engineer
Cerebra Integrated Technology Ltd
Delivered Azure, Windows Server, data center, virtualization, networking, and database solutions for government and enterprise customers.

- Configured Azure VMs and SQL platforms; executed database migrations, backup, disaster recovery, and performance tuning.
- Administered Windows Server, ADDS, Group Policy, DNS, DHCP, IIS, Hyper-V, failover clusters, and enterprise domains.
- Implemented VMware ESXi/vCenter/Horizon VDI and high-availability infrastructure for mission-critical public-sector environments.

May 2017 - Mar 2020

SELECTED TECHNICAL PROJECTS

Johnson & Johnson - LabVantage LIMS	Secure, highly available AWS/Azure infrastructure; server/database migration; IAM, WAF, monitoring, WebLogic, and production operations.
Dhani - Cloud FinOps	AWS cost optimization initiative delivering approximately \$28,000 per month in savings through analysis, rightsizing, commitments, and governance.
Biryani By Kilo	Multi-account AWS architecture using EC2, S3, EBS, Route 53, RDS, and Aurora for a high-traffic food technology platform.
Navi Migration	On-premises application migration to AWS via Migration Hub, landing zone, discovery, cost estimation, ALB/ASG, backup, monitoring, and GuardDuty.
ServicePlus	Rackspace database migration to AWS RDS using AWS DMS, including validation, cutover, and approximately \$1,500 in savings.
NIMHANS	New AWS platform using VPC, IGW, NAT, Route 53, CloudFront, RDS, Global Accelerator, Linux, WordPress, PHP, Nginx, and Redis.
ISRO - SDSC SHAR	VMware ESXi, vCenter, and Horizon VDI infrastructure for 100 Dell Wyse thin clients in an isolated environment.
Indian Air Force	Windows Server 2012R2, RAID-5, domain services, Hyper-V, and failover clustering on Fujitsu servers.

EDUCATION

Qualification	Institution	Year
MCA - Master of Computer Applications	Annamalai University	2022
BCA - Bachelor of Computer Applications	Annamalai University	2020
Diploma in Computer Science Engineering	BSF Institute of Technology	2017

RECOGNITION & LEADERSHIP

EMPLOYEE OF THE QUARTER
LoanTap Financial Technology | April 2022
Recognized for exceptional cloud infrastructure work, positive business impact, ownership, and alignment with company purpose and values.

- Architecture leadership across discovery, design, migration, cutover, production operations, and continuous optimization.
- Security-first delivery using IAM, MFA, WAF, GuardDuty, network controls, monitoring, and compliance-oriented practices.
- FinOps leadership using rightsizing, scheduling, commitments, storage optimization, and billing analytics.
- Clear stakeholder communication, technical mentoring, documentation, incident leadership, and knowledge transfer.
